Environment and Natural Resources Committee
Level 8, 35 Spring Street
MELBOURNE VIC 3000

NO. 6

Jenny Lindell MP

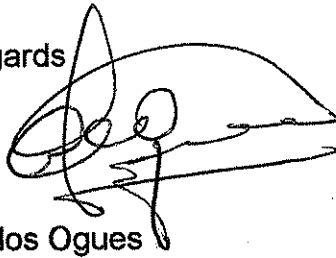

I refer to your request for a submission to the Inquiry into the Energy Services Industry.

Having installed Photovoltaic Systems in this area for several years, we have found that there is little consistency in the procedures of the electrical suppliers for the installation of such systems.

We strongly feel that a standard procedure is required across the industry.

This would help to ensure uniformity and dependability of systems and increase customer satisfaction which in turn will result in increase use of these renewable energy systems.

Regards

Carlos Ogues
Director
