On Behalf of concerned parents of students at Canterbury Girls High School - The music program is a valuable contributor to the school life of students and bringing forth well rounded individuals. It has a very positive impact on student learning, providing an opportunity for team work & creating a strong connection to the school community for our daughters. The incorporation of music training is considered a fundamental component of human culture and behavior. Music, like language, is an accomplishment that distinguishes us as humans. Our music educators are incorporating a sampling of the world's musical cultures to give a well-rounded musical experience and teach multiculturalism and international understanding. By looking to cut our musical programs at school you are jeopardizing all the benefits that music brings because many students who would have fully participated in learning and playing instruments will no longer get that opportunity.
