Please do not reduce/ delete the music funding to Canterbury Girls' Secondary College. My daughter is in year 8 this year and she is undertaking flute and piano lessons. She is also participating in the school band since she started last year in year 7. I strongly believe that music is an important part of children education. In my case, it has given my daughter a lot of benefits. Her participation in music has helped her confidence, creativity and also her being at school socially. She has made new friends through her participation in music. Overall, I believe that the music program at Canterbury Girls' is one of many important aspects for parents in choosing a school for their children. I am hopeful that the government funding for music at Canterbury Girls is still provided. I believe that many parents would agree with this. Please contact me should we need to discuss this further. Yours sincerely, Mariani
