

Received 13 July 2015

Dear Hilian,

I just would like to express my approval of Palliative Care rather than assisted suicide or euthanasia.

My mother was dying of Liver Cancer and was able to keep her composure with her own hand pump of morphine when the pain was bad, but her death was peaceful.

As I am now 66 years old, I dread having to sign my life away on entering a hospital or nursing home.

Sincerely,

Lenley Fraser.
