

Inquiry Name: Inquiry into End of Life Choices

Mr Alfred Rampertshammer

SUBMISSION CONTENT:

--

I am concerned that we shall be creating a class of people whose life is not as valuable as others. Palliative care is good and preserves the dignity of human life. I am fearful of giving the State power in this regard. I believe in the law of unforeseen consequences, future governments with this power over life and death may not be so benign and circumspect. Medical history has always been about do no harm. Do not I beg, let expediency take over from principle. I am hoping my brevity will still be taken seriously. As you all know many words don't always improve the case.
