Dear Inquiry Chair

I am sending this request that you will active consider controlled Voluntary Euthenasia during your your deliberations without interference from religious, medical or political factions.

As an elderly man I am traumatised by seeing many people including family and friends submitted to inhuman suffering and mental persecution in their final months and being kept alive to suffer further against their express wishes. Under such circumstances it is the right of the individual that is paramount.

I suggest that testimony from Dr Philip Nitschke of EXIT and the Dying with Dignity organisation carries far more weight than all the religious platitudes sprouted by many churchmen.

Regards  
John Crawford
