I wish to record my support for voluntary euthanasia. I have read arguments about end of life care and know of several instances where this was either inadequate or insufficiently relieved patient suffering in the final stages of painful conditions. I have an advance healthcare directive and have taken all the steps to appoint an enduring guardian. However, I want the assurance of knowing that I could make decisions about the end of my life and continue to receive expert medical care in doing so without involving anyone who assists me in activity associated with voluntary euthanasia, which is currently deemed illegal.
