End of Life Choices Enquiry

Although I am not a Victorian resident I believe that any policy which concerns Assisted Dying or Voluntary Euthanasia is of great importance to all Australian citizens. The wishes of individuals, who may be experiencing the loss of quality and enjoyment of life because of permanent disablement or painful suffering, should be given consideration and their choice to end their life if they wish should be respected. In Switzerland, Netherlands and Oregon State USA this practice has been working successfully and without exploitation. The argument that the situation may be exploited by relatives or the medical profession is spurious.
