

Inquiry Name: Inquiry into End of Life Choices

Mr Ashley Minniti

SUBMISSION CONTENT:

--

Victoria has an opportunity to become a leader in the field of end of life choices. Currently, there are many persons experiencing what can only be referred to as inhumane deaths as a result of our current laws.

My great-grandfather, a World War II Veteran, recently passed away after several years of living with kidney failure and dementia. The suffering that he endured was akin to torture, and was difficult for myself and other members of my family to deal with. I completely support a regulated approach to end of life choices, and believe that we have an opportunity here that cannot be wasted.
