Subject: Dying with Dignity

I am a retired nurse who has witnessed many deaths, mostly all prolonged and painful despite the administration of Opiates.
I know there are legal issues within a hospital environment.
I think that I should have a choice at end of life if I find I am in an intolerable and terminal situation, as do many others who wish their death be a peaceful and a dignified one.
I implore those in Parliament to carefully look at all submissions and to promote legislation that gives one freedom of choice to die with dignity.

Camille Gilmour
