**Subject:** Voluntary assisted dying

I am camping in central qld at the moment with dodgy internet connection but I want to say that my life is my property and if I choose that my time is up, that is my choice. If my health ( physical or mental ) is such that I have had enough why should I have to find a big tree to drive into or a cliff over which to jump? My atheist view is being disrespected at federal and state levels .Brian McConaghy
