Dear Legal & Social Issues Committee,

Inquiry into End of Life Choices

I am completely unaware as to the process of this inquiry, however I sincerely hope that specifics are provided before considering people's opinions on the matter, or should we say, conjectures.

I am completely for the notion of allowing persons to choose whether to live or die, as with all self actions, I am against the Orwellian dream that many others seem to crave, I do not wish to control others, only me.

However, I think that far more information should be provided on the plans of action before people decide to put their 2 cents in.

That being said, the terms of reference stated seem to be a good starting point, I look forward to seeing the report. I hope that we, the public, are contacted once the report is released, for our opinions on the actual proposal.

Regards,

Amir
