Subject: Dying with Dignity

While I am strong and fit and nearly 80, I'm working for new legislation which will give all who choose the right to die with dignity, under medical supervision.

From my mother's needless prolonged suffering and indignity after a stroke in her 94th year, I learnt how an Advanced Health Directive (which I have also signed) is not enough to allow doctors to carry out a dying patient's wish. Let us change the existing laws. Other animals already have this right.
