Subject: END OF LIFE PARLIAMENTARY INQUIRY

Dear Sirs,

I wish to add my opinion re the Victorian Parliament making legal medically assisted euthanasia. It seems long overdue to clear up the ambiguities and unenforcable nature of the current laws. Surely if there is no reasonable prospect of a patient's recovery and he/she is in severe distress or will be rendered incapable of rational existence, they should be allowed to die amd not be kept alive by artificial means. Drugs should be supplied to keep him or her free from pain or distress, even if the moment of death is hastened.

(Mrs.) Margaret Hawkins
