

Dear Libian

I believe that the Government of Victoria does not require any extreme changes such as assisted suicide or euthanasia, instead it is important that accessible palliative is available to all who need it; we already have financial and emotional elder abuse, and this opens the door to the ultimate in elder abuse.

Overseas in the Netherlands, and Belgium, the slippery slope has extended to children, and those with mental health issues

Life is a precious gift from God, and it is wrong that somehow the quality of life is seen as being superior to the sanctity of life

Regards
Ms Mary Reilly
