Submission 868

Sherryn Vevers

To whom it may concern, this is my story
I had Cancer in the ear canal in my thirties
mastoidectomy survived that
very bad back a lot of pain at the moment
bursitis pinched nerves causing pain on walking
my fear is to end up with Dementia I hope not.
my Mum is in a nursing home with Parkinson disease
and wants to float away
when I see all those poor people up there losing there
dignity, can't feed themselves wipe there own bottom
in pain it makes you wonder what's going to
happen to us later in life
everyone should have a choice to what they want
in life

I'm 64 and my Mum's 89 it upsets me sometimes
to see all these things.

thank you Sherry.
