Hi

This's not a reform , its destroying the whole industry in the name of the reform by the Labour Government !

- 1- I do average 2 jobs a day comparing to 4-5 jobs a day .
- 2- opening the markets only the profitable IT people with one Phone application to grab another peace of the market by focusing only on the cheaper rides .
- 3- attracting more people desperate to do cheaper rides especially overseas students as the focus only by these companies on profit (UBER , lyft , Didi , Ola) and a lot more every day .
- 4- destroying the full times jobs for the professionals drivers and Chauffeurs .
- 5- flooding the markets with private plates of Comercial nature and confusing the normal taxi street hail system .
- 6- unsafe drivers and cars in hundreds around the airport every day fighting for a fare and giving bad image for visitors .
- 7- causing traffic and congestion around the busy spots around the Cbd because that massive numbers of cars driving by oversea students trying desperately to have more cheap rides .
- 8- as a driver (Chauffeur) 34 years in the industry the people responsible of this big mess they need to admit the problems cause by the so call reform in order to fix it otherwise we went from aged transport regulated system to No System and welcome to the third world !!

Best regards
Mh
Michael Bajjali
