Dear Parliamentarians.

I have been financially ruined by the government allowing UBER to operate illegally. Since day one the government mainly the transport minister Jacinta Allen has been assisting/allowing UBER to operate illegally. Instead of stopping them in their tracks by taking them to court to stop their illegal activities.

These thoughtless and irresponsible decisions has ruined many lives and bankrupted many drivers.

I am one of those people who owned and operated a Limousine business. Due to above I am currently in deep financial strife and find it very hard to make ends meet. I have cars which i can't sell but still have loans to pay. I can't rent them because at the moment any car can be used as a hire car.

The compensation paid by the government does not cover the costs of the Licence fees i paid the government when i purchased the licences.

This is a criminal act by the government . If the Minister had any conscience or sense of moral obligation she should have at least offered to purchase the plates back at the same price they sold it.

It is not too late to compensate the drivers for their financial losses. There are many other drivers in my situation who are about to loose their livelihood and or maybe loose their lives.

Minister get of your high chair and do something about the mess and chaos you have created.

Thank you Semih Goker
