

6 March 2026

ExxonMobil Australia

Update to the Inquiry into the Decommissioning of Oil and Gas Infrastructure

130 years of reliably supplying energy to Australia

~60%

of gas supplied to the south east coast of Australia

>50%

of all of Australia's crude oil

10%

of Government revenue in our most prosperous days

100%

of Gippsland gas goes to Australian homes and businesses

\$41 billion

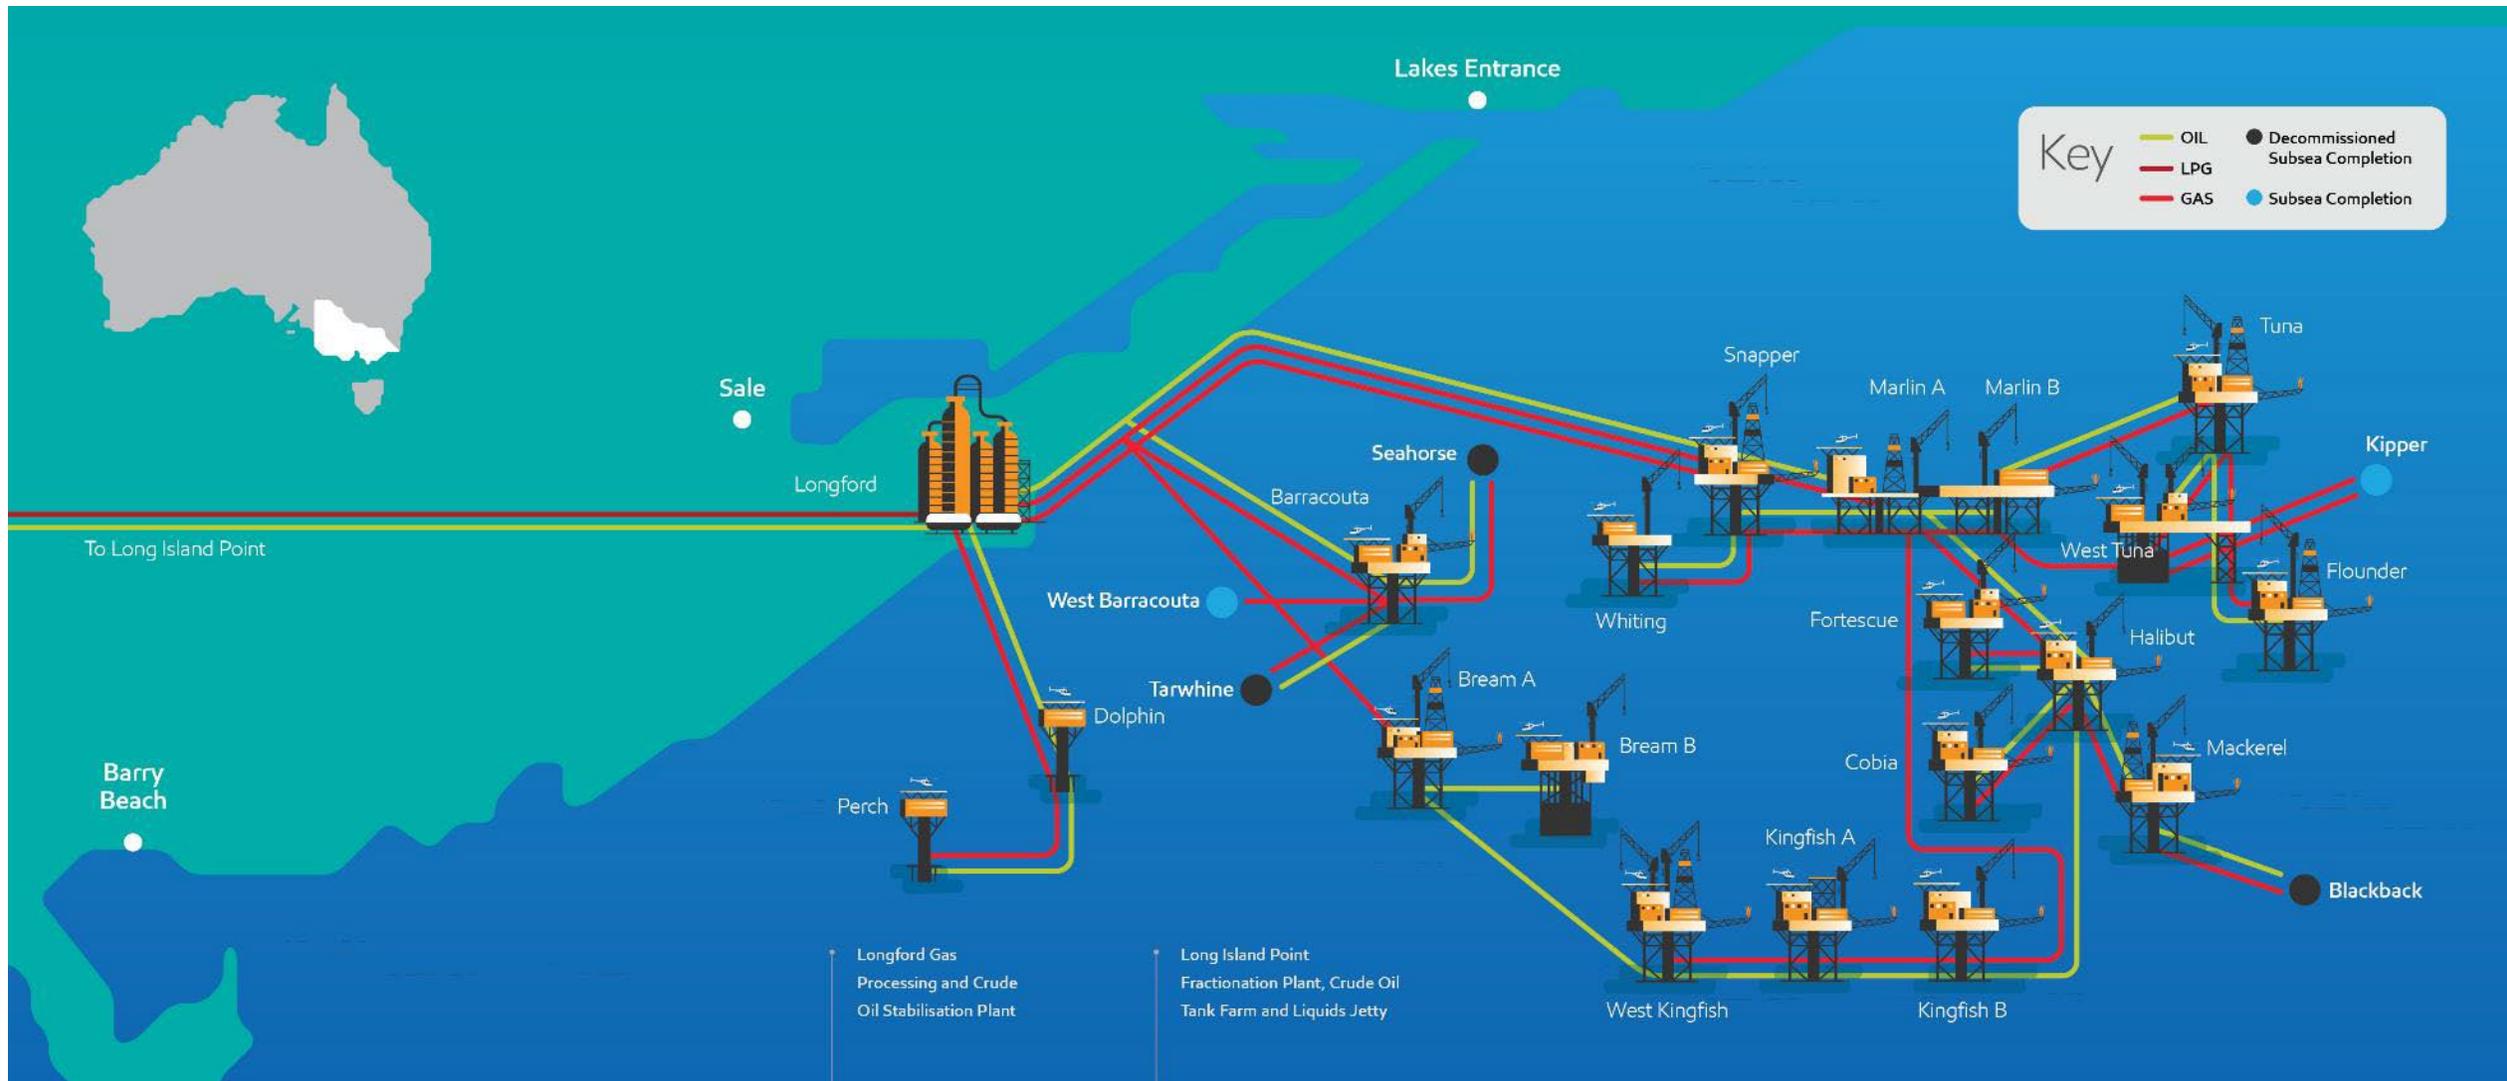

invested in Australia

~40%

of Victoria's fuel needs

Currently undertaking
Australia's largest decommissioning program
in Bass Strait

60 years of Gippsland Operations

Continued investment delivers essential gas to Australia

Turrum P3 & Kipper 1B

Kipper Compression Project

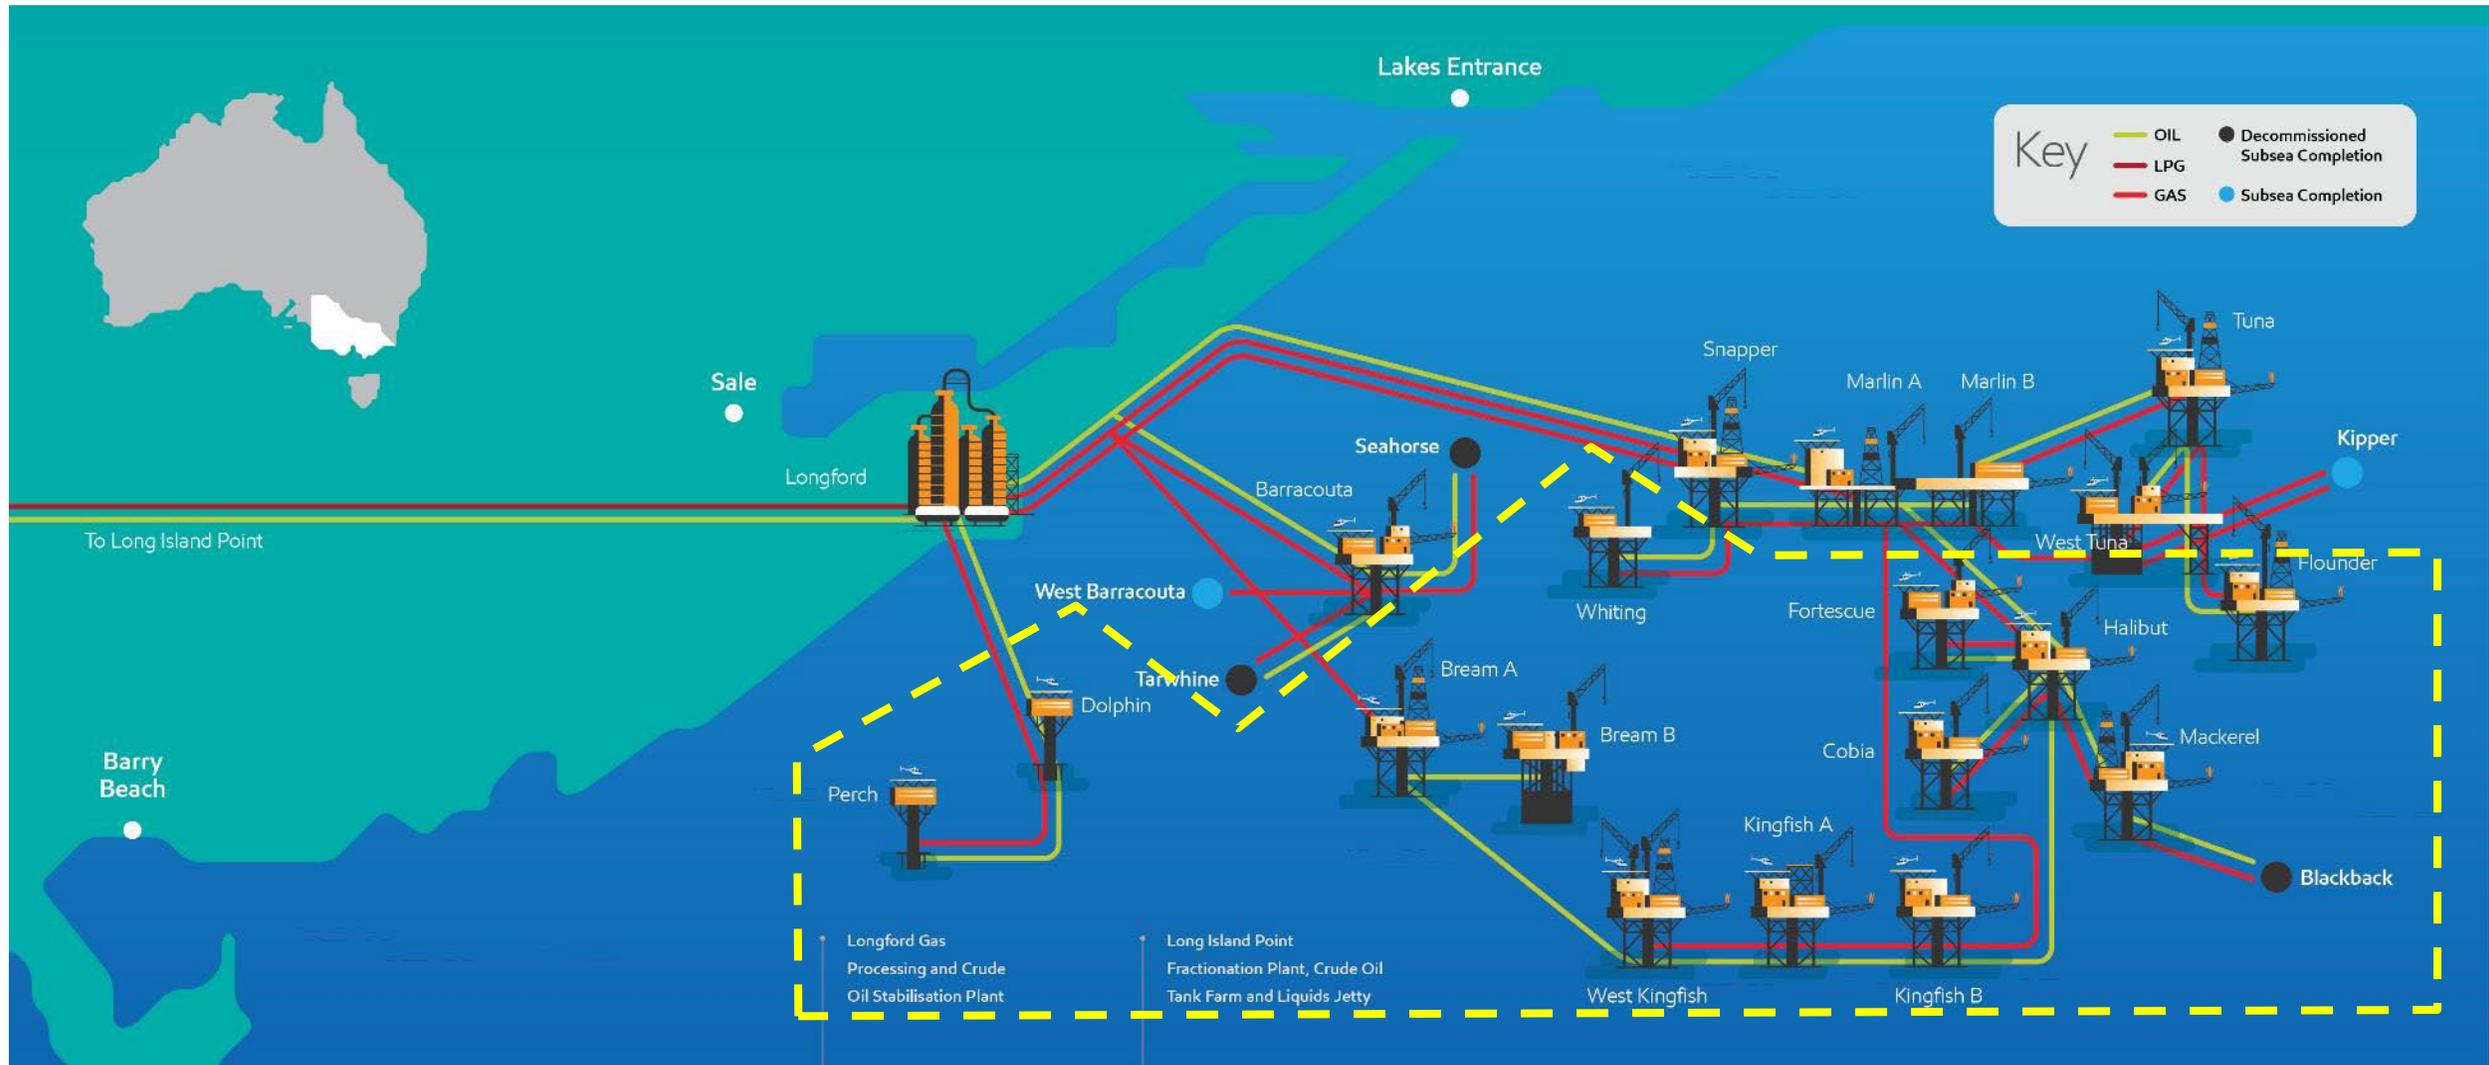

BOC & Air Liquide CO2 Processing Facilities

Hastings Generation Project

Ongoing delivery of gas requires a staged approach to decommissioning

Robust regulatory regime is in place

Stewarded by Commonwealth offshore, State offshore and onshore regulators including:

- ✓ NOPSEMA

Committed to meaningful consultation and engagement

Consultation

30,000+

Stakeholder interactions on decommissioning since 2020

Engagement

70+

Community groups supported each year

Contributions

Barry Beach Marine Terminal

60 years

supporting Australia's oil
and gas supplies

~\$3 billion

of early decommissioning
supported

>20,000

tonnes of offshore supplies
delivered each year

Birth-place

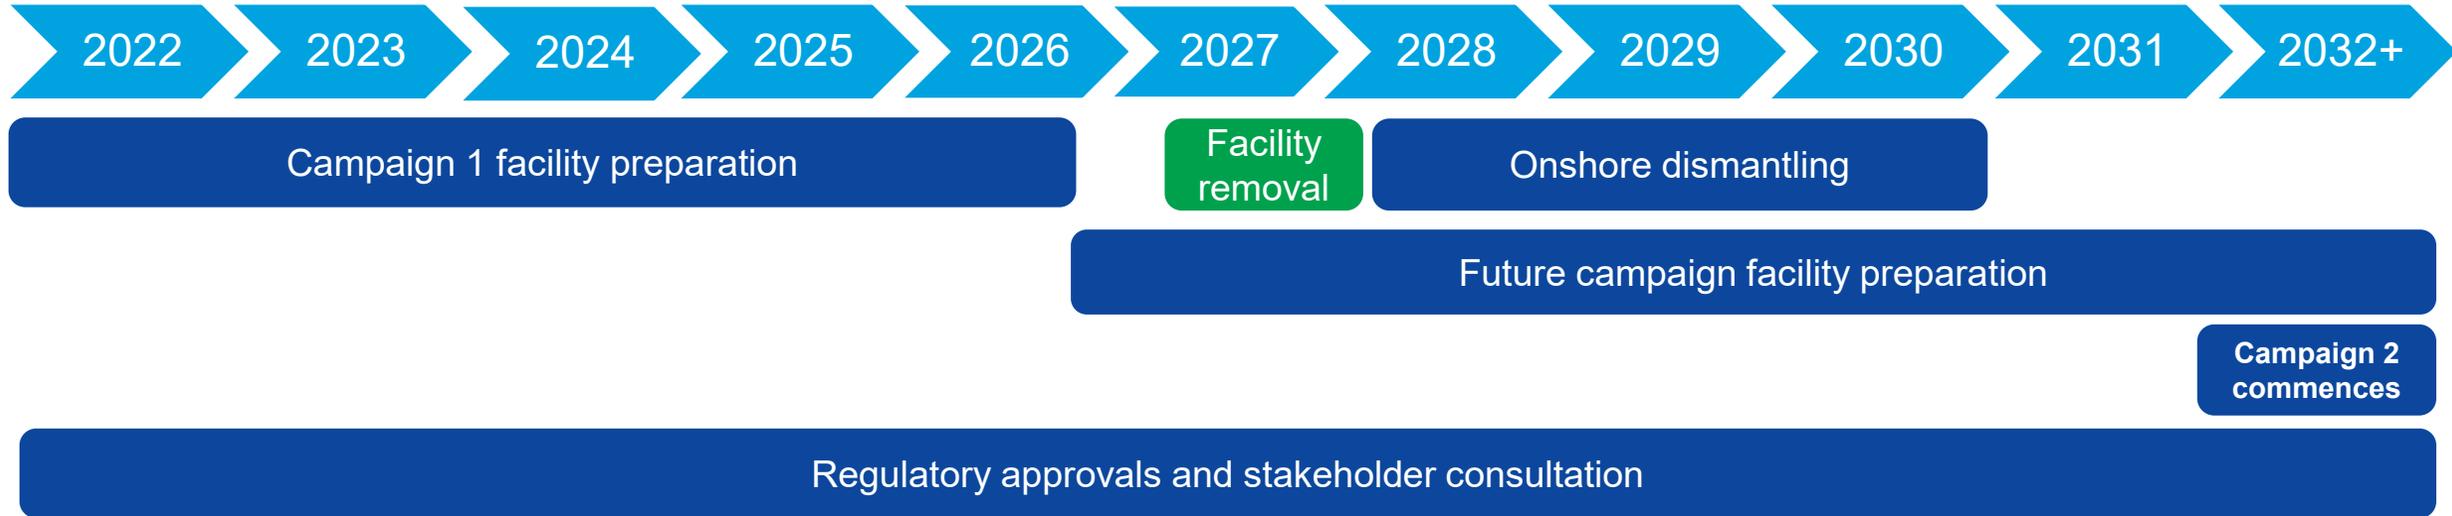

of our offshore
infrastructure

Barry Beach Marine Terminal's role in decommissioning

Indicative Timeline

700+ jobs

supported across
decommissioning

1000+ jobs

across our
Gippsland gas operations

6 facilities

continue to supply essential
gas to Australia

Thank you
