

Correction to transcript – Registered organ and tissue donor inquiry

Dear Legal and Social Issues Committee

I would like to correct the record of our testimony in the transcript on page 9.

The current text reads:

"Andrew MOSLEY: They even acknowledge that on their website. They talk about their speedy processes, and they sort of mention some other countries that they send the stem cells to, particularly Australia. I believe it has to be within a couple of weeks."

I would like to amend my comment to: "Andrew MOSLEY: They even acknowledge that on their website. They talk about their speedy processes, and they sort of mention some other countries that they send the stem cells to, particularly Australia. I believe it has to be **as soon as possible**."

Thank you for the opportunity to raise the importance of stem cell donations for blood cancer patients as part of this Inquiry into organ and tissue donation. As the subject matter experts on stem cell transportation and associated logistics, and provider of those services, we suggest this question is also put to the Australian Bone Marrow Donor Registry when they appear at the Inquiry on 25 August.

Regards,

Andrew Mosley
Head of Government Relations and Policy
