Legislative Council Economy and Infrastructure Committee

Enquiry into the development and expansion of waste-to-energy (WtE) infrastructure in Victoria

Parliament House,
Spring St, EAST MELBOURNE VIC 3002

Dear Committee Members,

Thank you for considering our submission.

We, at Climate Action Merri-bek would like to submit two documents for your consideration as part of this inquiry prepared by our founding convener the late John Englart.

We submit these in John's memory, and it reminds us both of how important it is to stop these harmful toxic incinerators, and on the other hand of John and what a great thinker, writer and worker he was always for the greater good.

The two documents we submit we see as very relevant for this inquiry are John's Climate Action Merri-bek submissions for

Striking the right balance for waste to energy in Victoria April 2025

Cleanaway Development Licence Application for MERC (APP024914) April 2024

If the committee wishes, we are very happy to come and speak about the important issues John has raised.
