

Submission Text: Hi

My Name is Andrew Hutchison I've been dealing with Tac since 10/10/17 or around that date

I've attached a taste of what my experience has been

From Tac Paying me out for a TBI then denying I have a 1770 Tribunal Book Which is in relation to the VCAT and Respondents final submissions I'll gladly provide this

I also am the same person referenced in Hutchison vs Queen VSCA 235 2021

To put it bluntly Before the motorbike accident in 2017 I was normal living normal and typical things most 20 years old go through working 3 jobs I had the accident Tac Hasn't supported me in fact In the Tribunal Book In their admin notes They viewed me as a hostile person very early And recognized me as a disabled person early day 1 However They treated me very poorly The prime example is this TBI Issue Their own doctors said I had a TBI Then they accepted liability in 2023 paid me a check Now they're in VCAT fighting me saying they were responsible that now it's in VCAT and even VCAT questioned it Now this New submission dated 11/3/2026 it was quite offensive And attacks me Despite the fact TAC Isn't meant to use out dated childhood diagnoses let alone Disability to discredit someone And say it's unrelated to the accident when their own doctors contradict them The whole experience has Pushed me into [REDACTED] Financial Strain Just denials and Pressures

I can Come in person and will speak more freely And answer questions or give testimony The whole experience has been painful And I don't have a lawyer in these VCAT matters I can't afford one and Due to my mental health in 2018 As Noted in 2021 vsca 235 Hutchison vs Queen I was in a deep Medical decline and very Unstable Yet Tac Is deliberately blaming

my childhood Stuff for it Despite the fact Prior to motorbike i didn't even have so much a parking ticket so its a frustrating exeprience
