

**Submission Text:** I am the founding member and director of Surfcoast Wildlife Rescue and have been rescuing wildlife in the Southwest region of Victoria for over 15 years. About 8 years ago we started collecting data on collisions with macropods in our region. We also are currently running a trial of Virtual Fencing in Anglesea which is in its third and final year. This trial, in its first two years has shown some really positive results in preventing collisions with all animals, not just macropods. We look forward to discussing this further if required.
