Question: Do you have a document that you can share that gives a breakdown of where they're not performing or not meeting their targets?

Reply:

Service Delivery Outcomes (Prisons)

The expected 2023-24 outcome for 'Proportion of benchmark measures in prison services agreements achieved' is 77.7 per cent compared to a target of 90 per cent. This is higher than the 2022-23 actual performance result (which was 75.4 per cent).

Currently, 22 measures are used in the calculation of the aggregated BP3 indicator, 'Proportion of benchmark measures in prison services agreement achieved'. Not all service delivery outcome measures apply to all prisons, due to differing functions played by facilities across the system and their varied security classifications. Different benchmarks apply to service delivery outcomes at each location given different security classifications and cohorts.

A detailed breakdown by facility cannot be provided due to commercial-in-confidence arrangements with prison providers.
