Subject: Establish and support our own recycling industry

RE: INQUIRY INTO RECYCLING AND WASTE MANAGEMENT

To whom it may concern:

The Chinese government has done us a great favour by refusing to take our recycling refuse. Now we will be forced to do what the Greens have been advocating for many a decade:
Establish and support our own recycling industry.

We must invest in the recycling of materials for useful, saleable products. We must establish useable waste streams for this purpose. We must minimize landfill and the emissions gases. We must institute a national container deposit scheme.

Please take immediate action to see that this essential service is properly funded from rates and taxes.
