Attention Leggislative Council, Economy & Infrastructure Committee

I am writing to you about how I have been left poor thanks to the government.

Our hard working life for 30 years has been stolen from us. After migrating to Australia my husband and I worked hard for a better life in our retirement. Our asset we purchased for \$350,000 has gone and the monthly income we were getting from it has gone. We only have an income of \$2000 a month to live on for only the essentials if that.

This has affected our health and has caused a lot of stress for us like many other people. We saved **penny by penny** to live in our retirement for the essentials. This has been stolen from us and has caused us to live in poverty. My husband does not have super and cannot get Centrelink because of the \$2000 a month income we have. We are 60 years old and left with nothing all because of the government how fair is that. Our lives ruined and left to live in poverty.
