Subject: Recycling

Please legislate to make manufacturers and retailers responsible for the full life cycle of packaging.

Packaging should either be biodegradable or recycled. All recyclables need to be incentivised with cash upon delivery to retailers/recyclers.

This is something government needs to force business to take care of, to protect the planet. Expecting consumers to drive it with their purchasing power is both ineffective and unfair. How many consumers have the time, knowledge or money to do this? That's what we pay governments to do.

Like the plastic bags, people will whinge for a while then get over it.

Please be a world leader. Set an example and do the right thing.

Many thanks.
