To whom it may concerned

I am opposed to Waste to Energy, where rubbish is incinerated. This would mean that resources that ought to be recycled or composted are destroyed. Waste to Energy has been shown in other countries to detract from recycling. Victoria needs to be serious about financial and environmental sustainability and have a strong focus on local recycling. In addition to environmental benefits, this will support creation of local jobs.

Regards,
Kate Chinarova,
Tertiary teacher at Swinburne Online Melbourne Victoria
