Thank you for this opportunity to have my say on recycling and waste management. I believe that a container deposit is essential to diverting usable material for Recycling. More importantly to me is policy to force supermarkets and food industries to reduce their plastic packaging. Single use water bottles need to be banned. Bulk water if needed. Fruit and vegetable shops also need to reduce plastic bag availability. Make businesses more accountable to plastics. Even MacDonal toys , ban them. Only used for a minute and then in land fill. Companies needed to ensure their products are recyclable. Policy for change.
