Subject: Unconventional Gas Exploration must be banned permanently

Dear Sir/madam,

I wish to strongly oppose unconventional gas industry in Victoria. Fracking has been proven to be highly dangerous, toxic and degrading to our environment and health.

I believe the Inquiry should recommend a permanent ban on all forms of unconventional gas exploitation in Victoria, including coal seam gas, tight gas, shale gas and underground coal gasification.

We need our farm land to be as pure and safe as possible to try and turn around the toxic mess we already have created through non-organic farming practices, and gas exploration will only worsen our agricultural position.

Please think of the future generations who will inherit this land, and their health and safety.

Permanently ban gas exploration now.

Thank you,

--

Kate Soulsby
