I am retired gas industry worker. I have worked for 35+ years at the Esso gas plant at Longford in Victoria.

I was there in when the explosion that resulted in the death of two workmates and injured many other people occurred.

I therefore feel I am well qualified to express my concern regarding the expansion of the industry on shore.

I feel that the regulation and ability to negate any risk is not proven and it is unrealistic to expect it to do so.

I therefore wish to confirm my commitment to opposing all onshore development and call for a total statewide ban.

Gary Goodwin.
