Subject: onshore gas

To whom it may concern,

I am a Victorian Australian and as such ask that your enquiry find that the exploitation of on-shore gas reserves is dangerous and unsustainable. I believe that it is madness to undertake exploration and mining of on-shore gas given the experiences of our neighbours in NSW and Queensland. Please make the watching of Frackman an activity for all committee members.

I plead with you. You have a once in a lifetime chance at this. You can either destine our beautiful State to further destruction in the greedy search for fuel or you can contribute to our evolution into a people who are hungry for reusable, sustainable energy sources.

Please. The power is with you.

Yours respectfully,

Leonie Guion
