**Subject:** I oppose UCG

Dear Committee members,

I am opposed to UCG. I am 31 year old mother, an IT consultant and I care about Victoria's future, especially regarding renewable energy jobs.

I would like Victoria to ban all unconventional gas drilling permanently, making Victoria a more attractive place for investments in these industries plus new investments such as renewables. Sustainable jobs is where Victoria should be heading, like SA have been.

Unconventional Gas is a fossil fuel. The rest of the world is divesting from fossil fuels, so I don't understand why Victoria (a state pursuing its own renewable energy target) would want UCG. It seems like a real backflip from parties who supposedly campaign for protecting the environment.

Thanks,

Dani
