Subject: SUBMISSION ON UNCONVENTIONAL GAS

I simply wish to record my deep concern about the mining of coal seam gas by means of fracking.

The law is absurdly biased in favour of miners and against the owners of the land under which resources lie - in this case farmers. And our economic judgement seems to be biased against seeing the value of boring old farmland and subterranean water in favour of putting it all at risk to get some gas for export.

For your consideration please.

Colin Smith
