Unconventional gas (ie fracking threatens) our aquifers and prime agricultural land. We must not cash in on a quick revenue raising scheme only to ruin our land for current and future, settlement and agricultural projects. Our aquifers do not have borders. As someone who has lived in the Riverland and the South East of South Australia, my whole life, I have always lived near the Victoria border. Whilst other parts of the States show interstate rivalry, Victoria represents my birthplace and a forward thinking State for South Australia to look to for leadership. For Victoria to go down this path is a betrayal to the country voters who voted in the Government, it is a betrayal to the people who voted for the Nationals and the Independent in Shepparton. Please do not ruin our water and our land in the pursuit of a quick buck.
