--

I am an aged pensioner concerned about the effects of unconventional gas mining on the environment. I have been active in the environment movement for most of my life and have never been so concerned about the methods of mining as now.

I strongly urge the Committee running the Inquiry to recommend that Victoria adopt a permanent ban on all onshore unconventional gas drilling.

The risk of serious damage to the environment surrounding the mining activity have never been so great with copious examples of pollution of ground water.

There can be no justification for the risks involved to simply add to the profits of large companies who only spend a short time in the area and are then gone for good leaving their irreparable mess behind.

Thank you for giving me an opportunity to add my beliefs and feelings to your enquiry.
