Subject: Submission to VIC gas fracking inquiry

We are the parents of an intelligent, hard working, very industrious 40 year old who will, within the next four years, own his own dairy farm in South Gippsland.

We are alarmed by what we have heard and read about the extreme negative effects of fracking wherever it has been done in Queensland or the United States. Fracking companies have been unable to explain, if indeed such an explanation exists, how in the light of all science so far fracking can be made safe. They have, moreover, shown their determination to frack at any cost to any one else except themselves.

We strongly recommend that the Victorian State government stand with us who live in country Victoria and adopt a permanent ban on all onshore unconventional gas drilling.

Yours sincerely,

Roy & Elizabeth Stephens
