Dear Committee members,

I'm a 25 year old agriculture student from Melbourne and I'm concerned about the impact that unconventional gas mining will have on the future of Victoria's agriculture industries. Soil and land are a truly finite resources, essential for creating food and sustaining life. I'm concerned that the long term impacts of exploration and supporting this industry are being overlooked in sight of short term gains. Please consider the long term health of our food producing land before you approve this crazy, carbon polluting technology.

Thank you.
Sally Stead
