Subject: No Fracking For Victoria

To Our Elected Representatives Of Parliament

Dear Members

We urge you to abandon any consideration of allowing the extraction of gas by unconventional means, in Victoria.

There are so many reasons to shelve any plans to pursue this proposed venture.

We need to reduce environmental contamination.

We need to preserve our agricultural land and underground water.

We do not have any shortage of gas, in Victoria.

We will not benefit economically.

We will not benefit as consumers.

Colin Barnes
