SUBMISSION CONTENT:

--

Victoria needs a permanent ban on all unconventional gas, including fracking.
Protecting existing jobs in agriculture and tourism is vital.
We especially need to protect our farming land and water resources to ensure there is always viable agricultural land for local food production.
Clean, fresh water is vital for wildlife and the natural environment too.
Encouraging energy efficiency initiatives is a much better, more sensible and more environmentally-friendly direction for the Victorian Government to be moving. Let's do that!
