Inquiries into unconventional gas in Victoria

Mrs. Jennifer Bishop
[REDACTED]

Dear Sir/Madam,

I feel there should be no fracking in search of gas as Victoria already has sufficient gas. It is much more important to retain and utilise all farming land for farm produce. It is also very important to create jobs in these areas as well as tourism and other renewable energies.

Victoria needs to produce more renewable energy to increase the percentage, so that all fossil fuels are left in the ground.

I sincerely hope that my feelings will be taken into account.

Yours truly,
Jennifer Bishop
