Subject: Fracking. Are you guys serious?

Surely the risks outway the benefits and you, like the rest of us, worry that fracking might really be a bad idea. Please don't pollute agricultural land and destroy communities just because you can. Can we not do better than this? How about some food security policy? Or will we just eat all that yummy gas?

But you guys are so clever and awesome I'm sure you'll figure it out and make some responsible decisions.

Regards,

Sarah Martinelli
