**Subject:** Submission to inquiry into unconventional gas

Dear EPC

Please accept this email as my submission to the inquiry.

I submit that Victoria needs a permanent ban on all unconventional gas.

I contend there is no demand that cannot be met from renewable energy sources, extraction of unconventional gas will not reduce gas prices and it is environmentally dangerous, putting jobs in agriculture and tourism at risk.

I support Victoria transitioning to zero net emissions and renewables such as wind, solar and hydro are much better placed to deliver this outcome.

Regards  
Phil Coyne
