> Good morning. My name is Leah Wendt I am writing to you because I am very concerned about the prospect of unconventional gas mining in Victoria and also Australia. I live in Bambra which is in the surf Coast shire. It is a very beautiful and peaceful part of the world. More importantly it is a big farming area. People's livelihoods would be greatly effected. I feel that unconventional gas mining is a short term gain for big business but in the long run maintaining land for agriculture will feed and clothe our population for many more generations to come.  
> Our community and surrounds were surveyed to find out how many people were opposed to UG and the results were a staggering 99% against it. Please take this into consideration.
