Subject: Permanent ban on fracking in Victoria

This letter is to register my support for a permanent ban on fracking in Victoria. Victoria has no shortage of gas and therefore does not be involved in this controversial practice in any way.

Many issues relate to fracking and why risk the contamination of our water supply for something that is not necessary in our glorious state?

The mining boom is ending. The next boom will be in agriculture as we seek to provide for the massive populations of our trading partners. Protect the water supply and you will be protecting our state, to allow Victoria to be part of that boom. We will be the state that is able to facilitate agricultural production and other states will watch with envy.

To protect our future, I urge your committee to recommend a permanent ban on fracking in Victoria.

Yours faithfully,

Virginia Shering
