**Subject:** Gas Fracking

Dear Sir,

I strongly object to Gas Fracking in Victoria because it can be proven to have poisoned both ground water and caused the poisoning of large numbers of cattle and sheep not only in Queensland but in the USA and poisoned the natural aquifers world wide. It has in Queensland ruined many a farmer where gas fracking companies illegally drilled on farmer's land although the farmer strictly forbade these companies to enter his/her properties under the law of Trespass. If Queenslanders are now forming a groundswell of support to prevent the stand over tactics of gas drillers from forcibly and illegally entering their farming properties we Victorian farmers will do the same.

Yours faithfully,

Henry Leschen.
