Subject: Submission re unconventional gas extraction methods

The Chair
EPC
Parliament of Victoria

Dear Sir/Madam/Miss
I would be grateful if you would register my deep concern that any decision to enable fracking in Victoria will have severe and lasting negative impact on the Environment, on Agriculture on Community Health on Lifestyle choices, on Tourism potentials for Victoria and ultimately, for all Victorians. This concern stems from my strong desire to see and support a sustainable lifestyle for future generations.

Please familiarise yourselves with the importance of Water to the Spirit of the Original Inhabitants of this land - how the spirit moves from from place to place through the water, across the landscape and through the underground streams.

I ask you to consider when will enough be enough ? Greed and ignorance has decimated our First Nation people and their land and now you are faced with a decision that can protect or poison the water that is the very life blood of this country - before and after death.

I wish you well in reaching a responsible and reasoned position that sincerely has the broader best interests of the community and our shared futures at heart.

yours Faithfully

Malcom Hansford
