I do not support any form of unconventional gas mining (including coal seam gas, tight gas, shale gas & underground coal gasification)

I am purchasing farm land in Victoria to carry out sustainable poly cultural farming. All of the evidence coming out of the USA after years of fracking have contaminated under ground water ways as well as rivers and streams. Air pollution is terrible and the side effects have ruined many peoples lives. The evidence is there and every one knows whats going on. The people do not want it.

The only way this will happen as far as I can see, is if we the people get railroaded. Which usually happens so I don't have much confidence in the out come of this.

Regards

Jonathan
