Dear Sir/Madam

I believe that NO drilling for gas or petroleum products should be allowed subject to the following conditions -

1. NO drilling within a 5 kilometre radius of a dwelling.
2. NO drilling within a 20 kilometre radius of a known underground aquifer - such as the Anglesea & Barwon Downs bore fields.
3. NO drilling until the underground water resources of the State have been mapped & thoroughly understood - even if this takes 100 years.
4. NO further drilling if an exploratory bore strikes water at any level.

We are custodians of this State's resources - our descendants deserve our utmost caution & respect for our/their environment.

I believe that it would be irresponsible to provide a short term benefit to the few by risking long term detriment to all!

Thankyou for the opportunity to make this submission.
