Hello , I am the granddaughter of a farmer and an Australian who has had the privilege of seeing much of this magnificent continent , particularly my home state of Victoria .  
I do not support any form of unconventional gas mining . The risk to our natural environment and our vital farming land are to great . To sacrifice water quality is to jeopardise the ecology that underpins both our tourism industry and generations of farmers to come .  
There are other sources of energy that are much less destructive and we should be putting our efforts there . Gas , like coal , is not an energy source for the future and it would be ludicrous to do damage attaining it . I want to see a state wide, permanent , ban on unconventional gas mining .  
Thank you for making that happen .
